

DO MORE WITH LESS ENERGY

Cascade Energy, Inc. is the leader in industrial energy efficiency.

Cascade Energy Inc., helps you do more with less energy in your industrial facility—reducing energy costs, and increasing productivity and profits. We understand complex industrial mechanical systems of all types, and we know how to optimize your systems without sacrificing performance or longevity.

Let us help you reduce your energy consumption between 10-25% or more with a comprehensive, long-term energy management program. Our approach to existing facilities includes metering, benchmarking, coaching, and facility tune-ups. Planning a new facility or expanding an existing facility? We also achieve exemplary results in new construction and capital projects. Since 1993, Cascade has spearheaded projects with some 500 industrial refrigeration systems in the US, Canada and Mexico.

Energy Management

Achieve energy savings that are measurable, reliable and sustainable. At Cascade, energy management is more than a single product or service. For us, energy management is a business strategy that combines key corporate and technological elements to produce measurable energy-cost savings, reliable performance, and sustainable results.

Our Energy Management Strategies Focus on these Core Elements

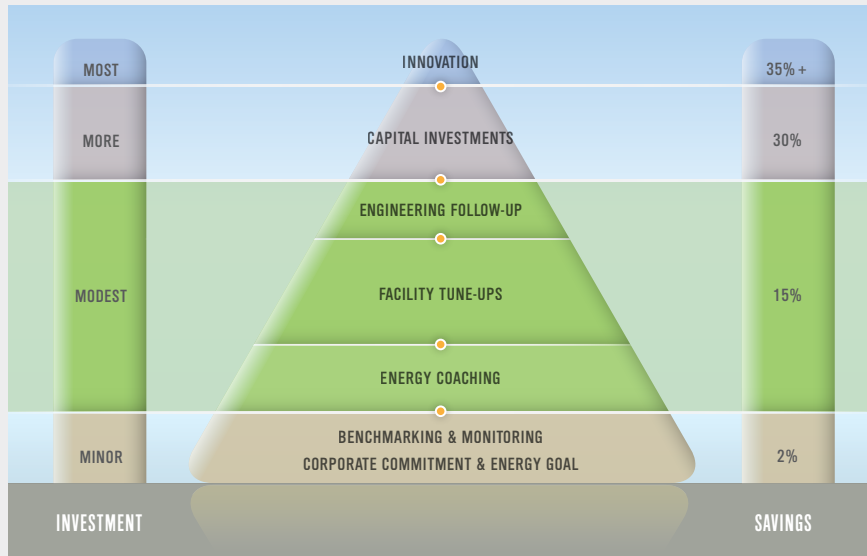

- Communicating a corporate commitment
- Establishing savings targets
- Implementing measurement and tracking tools
- Educating, training, coaching, and mentoring your staff
- Conducting comprehensive tune-ups using proven approaches and technologies
- Following up to ensure that recommendations are properly implemented
- Evaluating and recommending capital improvements and investments
- Applying innovative solutions appropriately

“ With the help of Cascade Energy we achieved 26.1% savings in the first three years through ‘Tune-ups’ and ‘Follow-up’ services. As a result, we have extended our contract with Cascade for another three years and expect to exceed our savings goal for a second time. Cascade’s unique systematic approach helped us implement low-cost-no-cost measures, real time monitoring, and consistent follow-up services in 28 of our facilities across the U.S. to achieve these sizeable energy savings. ”

—Richard P. Druce

Supervalu Director, Distribution Facility Maintenance

ENERGY MANAGEMENT STRATEGIES

At Cascade, we view energy management as more than a single product or service.

Instead we approach energy management as a holistic combination of factors that, when properly aligned, will give energy cost savings that are MEASURABLE, RELIABLE and SUSTAINED.

Our energy management strategies focus on these core foundations illustrated here.

Cut Expenses While Improving Performance

With our unique and proven approach, our experienced team of professional engineers collaborates with key members of your staff to navigate the process of reducing your energy costs.

THIS INCLUDES:

- Tailoring a program that works within your corporate culture
- Setting ambitious but attainable energy- and cost-reduction goals
- Implementing a communication plan
- Mentoring plant personnel (Energy Champions and team members) who take primary responsibility for managing energy use and improving efficiency
- Examining your facility and its operation with a fresh set of eyes
- Implementing a system to track energy consumption, at the site and company-wide
- Deploying flexible tools for analyzing and optimizing utility costs
- Real-time monitoring that identifies required actions
- Ranking and comparing the normalized energy use of all company sites
- Creating reports that clearly communicate performance and provide a platform for friendly competition where operators can share successes
- Providing tracking, alarm, and feedback tools to identify performance degradation
- Training and coaching site personnel to improve their knowledge of energy and systems to help them work through complex problems as they arise
- Strategic consulting and coaching on appropriate cost-effective capital investments
